

SYSTEM AUTOMATION OVERVIEW

This technical document outlines the complete event-driven automation framework for **CINIS (Cortex Intelligence Nexus Intel Solution)**. It coordinates traffic orchestration across Netlify frontends, Shopify checkout processing, automated digital fulfillment, multi-channel marketing, and CRM segmentation pipelines.

1. CORE ARCHITECTURE & ORCHESTRATION LAYERS

Orchestration Hubs	MIDDLEWARE	Connected Endpoints	INTEGRATIONS
• Primary Hub: Zapier / Make / Shopify Flow • Messaging Engine: Custom WhatsApp API / Automated Email • Social Scheduler: Cross-Network Syndication Hub		• Frontend: Netlify (Capture & Authority Nodes) • Commerce: Shopify (Product & Checkout Engine) • Channels: X, TikTok, FB, Medium, Bluesky • Nurture: WhatsApp Business API + CRM Email	

2. EVENT-DRIVEN TRIGGER EXECUTION CHAINS

Trigger A — New Website Visitor (Netlify Traffic Node)

1. Netlify CTA Display → 2. Tag Traffic Channel → 3. Capture Email / WhatsApp → 4. Deliver Free Asset → 5. Nurture to Shopify Product

Trigger B — Lead Form Submission (Netlify Custom Forms)

1. Add to CRM → 2. Intent Tagging (Cold/Warm/High-Ticket) → 3. Instant Confirmation → 4. Asset Delivery → 5. Start 5-Msg Sequence

Trigger C — New Shopify Purchase (Order Complete Event)

1. Confirm Payment → 2. Trigger Digital Fulfillment → 3. Tag Active Buyer → 4. Post-Purchase Upsell Sequence → 5. Channel Opt-in Link

Trigger D — Abandoned Checkout (Cart Recovery Engine)

1. Wait Interval → 2. Send Recovery Email → 3. Send WhatsApp Ping (Opt-in) → 4. Social Proof / Upgrade Offer → 5. Route to Checkout

Trigger F — High-Intent Booking Request (Netlify Discovery Node)

1. Qualification Scoring → 2. Filter Budget / Needs → 3. If Qualified: Calendar Invite + CRM Deal → 4. If Unqualified: Nurture Sequence

3. AUTOMATED TRIGGER REFERENCE MATRIX

Trigger Event	Source Platform	Primary Action Executed	Target Destination
New Visitor Arrival	Netlify Landing Page	Capture lead & tag traffic source	Email / WhatsApp Database
Form Submission	Netlify Custom Form	Add contact & assign intent tier	Central CRM Pipeline
Content Link Click	X / TikTok / Medium / FB / Bluesky	Route to targeted landing node	Netlify Direct Capture
Checkout Abandonment	Shopify Checkout	Initiate 2-stage recovery flow	Email / WhatsApp Direct
Completed Order	Shopify Store Engine	Fulfill digital assets & send receipt	Customer Download Portal
File Download Finished	Digital Delivery Engine	Mark active buyer & trigger upsell	Post-Purchase Nurture Flow
Booking Requested	Netlify Booking Node	Qualify score, send calendar invite	Internal Team Calendar / Deal Hub
Partner Inquiry	Netlify Partner Page	Dispatch Partner Pack & notify review queue	Partner B2B Pipeline

4. PHASED IMPLEMENTATION ROLLOUT

Phase 1 — Core Infrastructure • Netlify lead capture forms linked to email list • Shopify instant digital product fulfillment • Basic order confirmation & delivery sequence	Phase 2 — Revenue Optimization • Automated checkout recovery sequences • Post-purchase thank-you page upsells • High-intent booking qualification workflows
Phase 3 — Multi-Channel Integration • WhatsApp automated follow-ups for opted-in users • Partner inquiry evaluation pipeline • Traffic source-based audience segmentation	Phase 4 — Enterprise Scale • Automated cross-platform content syndication • Retargeting audience custom sync loops • Analytics & conversion route optimization
